

Today's attacks require strategic security operations. What if you could not only protect yourself, but make trust a major asset for your business? As the Trusted Partner for Digital Transformation, TDG is ready to help. Security decisions you make today can determine your organization's security and resilience for years to come. Our comprehensive security services and our consultants enable you to feel more confident about the actions you take to protect your office, employees, operations, facilities, and assets.

Real Time Monitoring

fiFist, give the most advanced level of maturity and deployment with wide variety of custom and commercial monitoring tools at your disposal to handle the individual components of continuous monitoring.

Organizations supported by **fiFist** are using advanced intrusion prevention, next generation firewalls, advanced log management systems with correlation capabilities, real-time enterprise network forensics and SIEM (Sec. Info. & Event Man.) to consolidate feeds into alerting systems.

fiFist's SIEM is able to provide high-level threat context by pulling data from asset DB, document or financial systems.

Reporting

fiFist, automates cyber data collection and analytics along with expert human intelligence to give you the necessary insights regarding the latest cyber activity trends

fiFist, uncover vital missing links and discover unknown or insider threats through the integration of real-time event correlation with user and behavioral analytics.

fiFist, equip you with the ability to accelerate both detection and remediation through analytics-driven, guided investigation tools.

Security Incident Management

fiFist, create a robust security environment with services that include threat assessments, policy review, development, and master planning.

fiFist's comprehensive security consulting services enable you to feel more confident about the actions you take to protect your office, employees, operations, facilities, and assets.

fiFist has experience on finance, manufacturing, transportation, insurance, education, retail, public and telco. TDG can help you create a robust security environment with services include current and emerging threat assessments, policy review, development, and master planning.
